CONTENTS—Proceedings Vol. 44, 1948

From September 1947 JOURNAL

Building Code Requirements for Reinforced Concrete (ACI 318-47) (44-1) 1
Reported by ACI Committee 318, A. J. Boase, Chairman

The Five-Year Temperature Record of a Thin Concrete Dam (44-2) 65
By S. D. Burks
Discussion (Part 2, December 1948 Journal) 76-1

Job Problems and Practice 77
44-185 **Integral Waterproofing Materials for Concrete**—W. E. Parker 77
44-186 **Storage of Bulk Flour in Concrete Silos**—Jacob Fruchtbaum, Anonymous 79
44-187 **How Much Wall is Effective in Stiffening a Concrete Beam?**—Allen H. Brownfield 80
44-183 **Anchor Bolts Set in Drilled Holes**—E. L. Richard 81

Current Reviews 85

From October 1947 JOURNAL

Cement-Aggregate Reaction in Concrete (44-3) 93
By Duncan McConnell, Richard C. Mielenz, William Y. Holland and Kenneth T. Greene

Crack Control in Portland Cement Plaster Panels (44-4) 129
By Bert A. Hall
Discussion (Part 2, December 1948 Journal) 140-1

Deterioration of Concrete in Brine Storage Tanks (44-5) 141
By Inge Lyse
Discussion (Part 2, December 1948 Journal) 148-1

Effect of Gypsum Content and Other Factors on Shrinkage of Concrete Prisms (44-6) 149
By Gerald Pickett

Job Problems and Practice 177
44-188 **Removing Clinker Rings from Rotary Kilns** 177
44-190 **Detector for Locating Reinforcing Bars in Concrete**—L. T. Cleaver 178
44-191 **Limonite as Coarse Aggregate**—Richard C. Mielenz 181
44-192 **Deterioration of Sacked Cement** 181
44-193 **Vibration of Air-Entrained Concrete**—H. S. Meissner 182

Current Reviews 185

From November 1947 JOURNAL

Protection of Electric Strain Gages in Concrete (44-7) 189
By R. H. Sherlock and Adil Belgin
Discussion (Part 2, December 1948 Journal) 192-1

Chemical Test for Reactivity of Aggregates with Cement Alkalies; Chemical Processes in Cement-Aggregate Reaction (44-8) 193
By RICHARD C. MIELENZ, KENNETH T. GREENE and ELTON J. BENTON
Discussion (Part 2, December 1948 JOURNAL) 224-1

Analysis of Two-Column Symmetrical Bents and Vierendeel Trusses Having Parallel and Equal Chords (44-9) 225
By JOHN E. GOLDBERG

Plastic Flow of Thin Reinforced Concrete Slabs (44-10) 237
By GEORGE W. WASHA

From December 1947 JOURNAL

Precasting Concrete Pipe for the San Diego Aqueduct (44-11) 261
By D. K. WOODIN

Strength and Slip Under Load of Bent-Bar Anchorages and Straight Embedments in Haydite Concrete (44-12) 289
By C. C. FISHBURN
Discussion (Part 2, December 1948 JOURNAL) 308-1

Proposed Recommended Practice for Winter Concreting Methods (44-13) 309
Reported by ACI Committee 604, R. W. SPENCER, Chairman

Job Problems and Practice 329
44-185 **Integral Waterproofing Materials for Concrete**—E. H. Logan 329
44-189 **"Hot Cement" Effect on Concrete Mix Temperature**—Myron A. Swayze 330
44-194 **Demolition of Concrete by Freezing** 331
44-195 **Copper Alloy Nails to Penetrate Nailing Concrete** 332
44-196 **Material Handling Simplified on Community School Project**—H. E. Getman 332

Current Reviews 337

From January 1948 JOURNAL

Some Doubts About Concrete (44-14) 345

Economy in Structural Design (44-15) 349
By I. E. MORRIS
Discussion (Part 2, December 1948 JOURNAL) 360-1

Study of Causes and Prevention of Staining and Pop-Outs in Cinder Concrete (44-16) 361
By S. G. SEATON

Concrete Making in China (44-17) 381
By JOHN S. COTTON
Discussion (Part 2, December 1948 JOURNAL) 400-1

Design of Rectangular Tied Columns Subject to Bending with Steel in All Faces (44-18) 401
By D. R. CERVIN

Job Problems and Practice 413
44-192 **Deterioration of Sacked Cement**—Thomas J. Bray 413
44-197 **Water for Making Concrete** 414
44-198 **Sawing and Cutting Concrete Specimens**—R. F. Blanks 416
44-199 **Dust Problem in Loading Truck Mixers** 418

From February 1948 JOURNAL

Prevention of Dampness in Basements (44-19) 421
By CYRUS C. FISHBURN
Discussion (Part 2, December 1948 JOURNAL) 436-1

Highlights of the Development of Reinforced Concrete and the Study of Bond (44-20) 437
By Arthur P. Clark
Discussion (Part 2, December 1948 Journal) 440-1

Long-Time Study of Cement Performance in Concrete, Chapter I—History and Scope (44-21) 441
By F. R. McMillan and I. L. Tyler

Analysis of Normal Stresses in Reinforced Concrete Sections Under Symmetrical Bending (44-22) 457
By Michel Bakhoum

Creep of Steel and Concrete in Relation to Prestressed Concrete (44-23) 485
By Gustave Magnel

Job Problems and Practice 501
44-199 **Deterioration of Sacked Cement**—W. Parker 501
44-200 **Grouting Repair of Masonry Arch**—E. C. Harding 502
44-201 **Carbon Disulfide Effect on Concrete** 503
44-202 **Entrained Air Loss in Handling, Placing, Vibrating**—Lewis H. Tuthill 504

Current Reviews 505

From March 1948 JOURNAL

Repairing Concrete Hydraulic Structures (44-24) 513
By Claude Gliddon

Bond and Anchorage (44-25) 521
By T. D. Mylrea
Discussion (Part 2, December 1948 Journal) 552-1

Long-Time Study of Cement Performance in Concrete, Chapter 2—Manufacture of the Test Cements (44-26) 553
By F. R. McMillan and W. C. Hansen
Discussion (Part 2, December 1948 Journal) 604-1

From April 1948 JOURNAL

President's Address (44-27) 605
By Stanton Walker

Effect of Carbon Black and Black Iron Oxide on Air Content and Durability of Concrete (44-28) 613
By Thomas G. Taylor
Discussion (Part 2, December 1948 Journal) 624-1

Aggregate Reaction with Cement Alkalies (44-29) 625
By Willard H. Parsons and Herbert Insley
Discussion (Part 2, December 1948 Journal) 632-1

Restoration of Barker Dam (44-30) 633
By Raymond E. Davis, E. Clinton Jansen and W. T. Neelands
Discussion (Part 2, December 1948 Journal) 668-1

Normal Stresses in Reinforced Concrete Sections Under Unsymmetrical Bending (44-31) 669
By Michel Bakhoum

Progress with Concrete, 1923-1948 (44-32) 693
By Waldo G. Bowman, P. H. Bates, J. C. Pearson, Roy W. Crum, Frank E. Richart and Roderick B. Young
Discussion (Part 2, December 1948 Journal) 744-1

Long-Time Study of Cement Performance in Concrete, Chapter 3—Chemical and Physical Tests of the Cements (44-33) 745
By William Lerch and C. L. Ford

From May 1948 JOURNAL

Prefabricated Pumice Concrete Houses (44-34) 797
By H. L. Mathews

Development of Tilt-Up Construction (44-35) 813
By C. A. Clark

Durability of Concrete Exposed to Sea Water and Alkali Soils—California Experience (44-36) 821
By Thomas E. Stanton
Discussion (Part 2, December 1948 Journal) 848-1

Thermal Insulation of Concrete Homes (44-37) 849
By Arthur Stone

Long-Time Study of Cement Performance in Concrete, Chapter 4—Microscopical Study of Clinkers (44-38) 877
By L. S. Brown

Current Reviews 925

From June 1948 JOURNAL

Concrete Pavements on the German Autobahnen (44-39) 933
By F. H. Jackson and Harold Allen
Discussion (Part 2, December 1948 Journal) 976-1

Concrete Deterioration in a Shipway (44-40) 977
By Ruth D. Terzaghi

Effect of Various Coarse Aggregates Upon the Cement-Aggregate Reaction (44-41) 1009
By C. H. Scholer and W. E. Gibson

Evaluation of Aggregate Performance in Pavement Concrete (44-42) 1033
By H. S. Sweet and K. B. Woods

Laboratory Measurements of Stress Distribution in Reinforcing Steel (44-43) 1041
By Douglas McHenry and W. T. Walker
Discussion (Part 2, December 1948 Journal) 1056-1

Job Problems and Practice 1057

44-198 **Sawing and Cutting Concrete Specimens**—Mark Morris 1057
44-203 **Design Table for Reinforced Concrete Bearing Walls**—Paul Rice 1058
44-204 **Chemical Reactivity of Dolerite (Diabase)**—Bryant Mather 1058
44-205 **Triethanolamine as Air-Entraining Agent**—H. F. Gonnerman 1061
44-206 **Clay Coating on Aggregates**—Robert F. Blanks 1061
44-207 **Pumice Concrete** 1062

Current Reviews 1065

From Part 2 December 1948 JOURNAL
